14. Upon information and belief, the following describes, at least in part, the Embarcadero software activation process:

#### What is the official license wording related to the restrictions?

In the event Licensee has obtained a Starter edition license, the following terms hereby apply. To the extent they conflict with the license grant in Section 2.1, these terms shall control. Licensee may use the Product to develop software (i) for which Licensee does not charge directly or indirectly a fee or receive other consideration including but not limited a license fee, a service fee, a development fee, a consulting fee, a subscription fee, a support fee, a hosting fee or the like and (ii) for which Licensee only charges fees (including but not limited a license fee, a service fee, a development fee, a consulting fee, a subscription fee, a support fee, a hosting fee or the like) that cumulatively, on an annual basis, do not exceed US \$1,000. In the event any (for profit or non-profit) company elects to license the software then (i) the total company revenues may not exceed US \$1,000 and (ii) the total number of Starter Edition licenses deployed may not exceed 5.

#### Are the Starter editions a good choice for schools?

Embarcadero offers academic discounts on the Professional, Enterprise and Architect editions with pricing lower than the Starter pricing, so we recommend the higher editions for academic use. Also, the Starter editions have a limit of 5 simultaneous users per subnet, so they aren't suitable for classroom or lab use with multiple users.

#### Why is there a limit of five users per subnet?

**If a single user starts two instances of a Starter edition product, does that count as two toward the maximum of five?**

15. Upon information and belief, the following describes, at least in part, the Embarcadero software activation process:

## Serial Number (License Key)

The serial number, also called the license key, that you enter determines the product that will be installed, the product edition (such as Starter, Professional, Enterprise Ultimate or Architect), and the type of license (commercial, academic or trial).

19. Upon information and belief, the following describes, at least in part, the Embarcadero software activation process:

20. Embarcadero has directly infringed one or more claims of the '696 Patent in this judicial district and elsewhere in Texas, including at least claim 1, either literally or under the doctrine of equivalents, by or through making, using, importing, offering for sale and/or selling software that implements piracy prevention technology including, without limitation, RAD Studio XE7 and Delphi XE7 products.

21. Embarcadero may have infringed the '696 Patent through other software utilizing the same or reasonably similar activation functionality, including other versions of the RAD Studio XE7 and Delphi XE7 software and XE8 software. Uniloc reserves the right to discover and pursue all such additional infringing software. For the avoidance of doubt, the RAD Studio XE7 and Delphi XE7 software is identified for exemplary purposes and in no way limits the discovery and infringement allegations against Embarcadero concerning other software that incorporated the same or reasonably similar activation functionality.

22. Uniloc has been damaged, reparably and irreparably, by Embarcadero's infringement of the '696 Patent and such damage will continue unless and until Embarcadero is enjoined.

23. Uniloc has entered into a Patent License, Release and Settlement Agreement with Flexera Software LLC ("Flexera"). Uniloc is not alleging infringement of the '696 Patent based on any product, software, system, method or service provided by Flexera Software LLC or any Flexera Predecessor ("Flexera Products"). For the purposes of this action, a Flexera Predecessor is any predecessor business owned or controlled by Flexera, including, but not limited to, C-Dilla Limited, GLOBEtrotter Software, Inc., InstallShield Software Corporation, Flexera Holding LLC, Flex co Holding Company, Inc., Flexera Software Inc., Acreso Software Inc., Intraware, Inc., Managesoft Corporation, HONICO Software GmbH, LinkRight Software L.L.C., and Logiknet, Inc. (d/b/a SCCM Expert) and only to the extent of, and limited to, the specific business, technologies and products acquired by Flexera from each of them, and Macrovision Corporation (renamed Rovi Solutions Corporation in July 2009) only to the extent of, and limited to, the specific business, technologies and products acquired by Flexera Holdings Company, Inc. in April 2008 (renamed Acreso Software Inc.), which later changed its name in October 2009 to Flexera Software LLC. For purposes of this action, Flexera Products do not include any third party products or services that provide activation, entitlement, licensing, usage monitoring and management, auditing, or registration functionality or third party products and services that are activated, licensed or registered exclusively and independently of products, software, systems, methods or services provided by Flexera or Flexera Predecessors. All allegations of past infringement against defendant(s) herein are made exclusively and independently of the authorized use of Flexera Products.

Uniloc requests that the Court enter judgment against Embarcadero as follows:

- (A) that Embarcadero has infringed the '696 Patent;

- (C) enjoining Embarcadero, its officers, directors, agents, servants, affiliates, employees, divisions, branches, subsidiaries and parents, and all others acting in concert or privity with it from infringing the '696 Patent pursuant to 35 U.S.C. § 283;
